

Hi Richard & Staff.

Just like to leave a few comments for your book after today's visit as follows >>>>>

14 January 2009

After attending other dental practices in the past, I now feel I have found a true home as far as my treatment goes.

I am going through a difficult and worrying time at the moment as regards to problems with my two dental bridge's.

Previous dental practices gave me little if no hope and limited advice on how to proceed an tackle my bridge problem which left me feeling flat.

After meeting Richard, he gave me many more options and solutions which I never though were possible, I had lost faith and feared the worst, but Richard talked me through the options openly.

He has also been able to treat me using the best quality treatment and modern equipment while keeping the price sensible and affordable.

His techniques during appointments are way above what I have been used to in the past and he explains everything in simple terms during the process and keeps the patient updated constantly.

Not forgetting the staff and dental assistants who come over very relaxed and friendly which makes me feel at home and not in a dental waiting room as such.
